

# STARTUP

## Startup Funding

We do not just fund businesses. We don't just give a little money. We do the hard work of assessing your team, detailing the opportunities and challenges you face, scouting for partners and vendors, developing your business plan and marketing strategy, helping you define your funding needs and finding solutions to every problem your startup faces.

## Real Estate Investment

We make real estate investing easy. All you need is the right information, expert advice, and a solid plan to follow. With us, you can invest in real estate without all the stress.

## Revolving Credit Facility

We provide Revolving Credit Facility to our clients. With a revolving credit facility, you can have greater control over your cash flow, expand business opportunities and control your long-term liabilities by paying off only the principal amount of your loans, at any time up until their maturity date. These facilities are commonly called lines of credit or credit lines.
